

**Abstract**

A scrubber for eliminating NO from air flowing through  
5 the scrubber, comprising a housing (1) having at least  
one inlet hole (2) and an outlet hole (4) and which is  
comprising filtering material (6). A second outlet hole  
(9) is provided in the housing (1) at a position  
situated at a distance from the first outlet hole (4)  
10 and any inlet hole (2) so that the air leaving the  
second outlet hole (9) will have flown at least through  
a depth of the filtering material (6) substantially  
corresponding to the depth of the filtering material (6)  
for the air flowing from the inlet hole (2) to the first  
15 outlet hole (4).
